

Spurrs Stud Wagin

Spurrs Stud is a Standardbred Horse breeding Farm located in Wagin and is the home of Bonavista Bay, a truly striking stallion by appearance, built for power who is ready to share his winning genes with his future progeny.

Spurrs Stud is a name synonymous with champion sires – Bonavista Bay, Better Be The Best, Shoobees Place, Unwritten Rule, Regal Aura to name a few.

Their yearly sales features an array of young horses with aspirations to greatness and the process that brought them to the Spurr Stud is one that did not happen by chance.

Seeking out the best prospects is the starting point and that involves evaluation of pedigrees, conformation and suitability to Australian race conditions as well as racing ability. This all equates to 'will this horse be an asset to our farm?'

Once identified, the next task is the acquisition of a horse and quite frequently it's not all about the money, but what a stud can offer in terms of quality of life for the stallion, opportunity to cover excellent books of suitable mares and ongoing marketing of the stallion and his offspring when they eventually hit the sale ring.

It is invariably a combination of factors that result in the purchase of a stallion prospect and Spurrs Stud have been at the forefront of acquiring some of the best and most promising in recent years and have a unique ability at ensuring a young stallion is well patronised who establishes success from early on in their stud career.

At Spurrs our team is focused on providing the individual care and attention to each horse ensuring each foal gets the best possible start in life, every yearling grows to its full potential and all the mares are cared for like they are our very own.

Spurrs aim as a stud is to be fair to our clients in a way that is sustainable. We, like you, are breeders, understanding the nuances of this complex industry, and are subject to the ever changing fashions of the market place. As much as it changes there is one constant; good types of horses never go out of fashion and we rely heavily on the type of horse we breed as the cornerstone of our success.
